Group 5 - Bike Alert

Michael Heron
Braden Mayew
Justin McKenzie
Bryan ...
Sam Maloney

Michael
- Responsible for the creation and configuration of the Firebase database
- Created the Firebase login Activity
- Wrote classes for Riders, Bikes, and Requests
- Primarily responsible for any Firebase implementation/debugging and offering assistance for the group

Braden Mayew
- Worked closely with Bryan to implement the Google Maps API
- Created widgets for the Google Maps API, including Search and Find Current Location
- Assisted with the integration of Firebase into the core App
- Helped with debugging and piecing together the various contributions from the team

Justin McKenzie
- Designed and implemented the nav drawer and all of its respective layouts
- Implemented the nav drawer in various stages of the project
- Assisted with map UI for riders and alerts
- Assisted with final debugging

Bryan
- Worked on getting google maps api working
- Assisted Braden with getting stuff working with the google maps activity
- Helped piece together everyone's code
- Worked with Michael to troubleshoot final firebase issues

Sam Maloney
- Designed and implemented the AddBikeInfo class and layout
- Assisted with the application UI
- Assisted with debugging of the app

Braden Last Tuesday at 7:03 PM
oh ok. i got firebase connected
so whenever the login is ready we need to merge your code with the code bryan and I have

Michael Last Tuesday at 7:03 PM
Do you want me to send it or upload it?
which is easier for you?

Braden Last Tuesday at 7:04 PM
you can send it on here

Michael Last Tuesday at 7:05 PM

LoginActivity.java
3.29 KB

Let me know if anything is confusing
AddBikeInfo is the activity Sam is working on now

Braden Last Tuesday at 7:10 PM
is AddBikeInfo.class what Sam is doing right now

Sam Last Tuesday at 7:10 PM
Yes

Braden Last Tuesday at 9:00 PM
LoginActivity, with an empty MainActivity, the Navbar, GoogleMaps Activity

📄 **BikeApp.zip**
212.65 KB

Sam Last Tuesday at 9:36 PM
AddBikeInfo with layout, updates resources

📄 **BikeApp.zip**
409.21 KB

Braden Yesterday at 1:43 AM
ill add it

Michael Yesterday at 11:40 AM
```
FirebaseFirestore db = FirebaseFirestore.getInstance();
    FirebaseUser user = FirebaseAuth.getInstance().getCurrentUser();
    String email = user.getEmail();
    final DocumentReference docRef = db.collection("riders").document(email);
    docRef.addSnapshotListener(new EventListener<DocumentSnapshot>() {
      @Override
      public void onEvent(@Nullable DocumentSnapshot snapshot,
                  @Nullable FirebaseFirestoreException e) {
        if (e != null) {
          Log.w(TAG, "Listen failed.", e);
          return;
        }
```

Michael Yesterday at 3:15 PM
There is definitely space for everyone, but I can also just discord in, doesn't super matter to me

Justin Yesterday at 3:15 PM
I can do 4

Bryan Yesterday at 3:15 PM

📄 **BikeApp.zip**
215.67 KB

Justin Yesterday at 3:16 PM
we could all just meet at michaels office

Bryan Yesterday at 3:16 PM
This is the current file if anyone needs it
I have some code in there that isnt really doing anything right now
need to figure out how to get it to work with firebase

Braden Yesterday at 3:20 PM
I had it linked with firebase
Bryan I can show you how to set it up on your machine

Braden Yesterday at 11:18 PM
nice job guys, sorry i couldnt be there
im gonna add the logo to the launcher icon. (edited)

Michael Yesterday at 11:37 PM
Yeah don't worry about the logo
Shit is done
We can worry about it next project

Braden Yesterday at 11:37 PM
logo is already done
but ya

Justin Yesterday at 11:37 PM
Eh I mean adding it to the launcher icon isn't a bad idea
